Multiplication tables check information and result

What is the multiplication tables check?

The purpose of the check is to determine whether your child can fluently recall their times tables up to 12, which is essential for future success in mathematics. It will also help your child's school to identify if your child may need additional support.

The check is a statutory requirement for all children in Year 4 and takes place in the summer term.

This year, the check was carried out within a three-week period starting on Monday 06th June 2022.

How does the check work?

It is an on-screen check consisting of 25 times table questions. Your child would have been asked to answer 3 practice questions before taking the actual check. They would have had 6 seconds to answer each question. On average, the check should have taken no longer than 5 minutes to complete.

How is the check marked?

Your child receives a mark out of 25, there is no pass mark or expected standard threshold for the check.
