This module enables schools to establish a regular reporting cycle (termly and/or end of year) which brings together assessment and attendance data into a single report for parents. Schools have control over the workflow from choosing a pre-defined report format through to teacher completion, review, approval and producing reports. The package consists of:

- Initial definition of reporting requirements and creation of bespoke markbooks where necessary
- Guidance and instructions for Integris administrators to set up the reporting cycle and audit the process
- Help sheets for teachers/head teacher entering comments for reports

*Schools can start using this module at any time during the year to develop familiarisation with the module and may opt to produce termly reports for specific year groups through to producing reports for all pupils at the end of the year.*

### **Virtual (via Zoom) Training Sessions**

We provide a number of virtual sessions throughout the year on essential areas of the Integris system (e.g. Pupil Premium) as well as new topics or specific features within or related to Integris.

These sessions are FREE to schools who subscribe to the Essentials package and/or First Line Helpdesk.

We also provide Integris (and related) training for new administrators (up to 3 separate sessions) free of charge where the school subscribes to the Essential package.

### **Bespoke training and/or consultancy - £48 per hour per school regardless of the number of delegates**

Our preference is to provide bespoke training to the school on request so that we can target training to the needs of the individual and their role and responsibilities within the school. Training content can cover a mixture of essential training for new users alongside refresher training for more experienced users.
